

About the job

1. **Fintech Association for Consumer Empowerment (FACE)** is a non-profit industry association and **RBI-recognised Self-Regulatory Organisation in the FinTech sector (SRO-FT)**. FinTech companies come together at FACE to facilitate consumer-centric digital financial services that are safe, suitable, and transparent, delivering positive impacts on society and the economy. Please visit our website and refer to the SRO-FT Framework to understand our work.
2. FACE is looking for a hands-on engineering and tech professional to support and drive growing automation and technical needs within FACE through technology-enabled solutions, off-the-shelf tools/applications, and data & analytics leveraging cloud environment. The role combines technology management with solution development and suits someone who can independently translate business requirements into practical technology solutions. The candidate will also coordinate with external technology partners/vendors for execution and oversight, where necessary. This position offers an opportunity to build and manage FACE's evolving technology ecosystem while working with a cross-functional team.
3. Location preference is Mumbai. Position and salary commensurate with work experience and skill sets.

Responsibilities

- Manage FACE's technology infrastructure, cloud platforms, hosting, domains, productivity/off-the-shelf subscriptions etc.
- Lead technology projects from requirement gathering and solution design through development, testing, deployment and enhancement.
- Design, develop and maintain applications, internal tools, dashboards and digital solutions for different business needs.
- Develop and manage APIs, system integrations, databases and technology platforms.
- Evaluate and implement appropriate in-house, third-party, cloud or technology solutions.
- Technology project management, vendor selection and management and coordination of technology partners/resources/stakeholders for timely delivery.
- Explore AI, automation, analytics and emerging technologies and develop relevant proof-of-concepts.
- Establish appropriate practices around credential-based access, security, backups, documentation and operational continuity.

Selection criterion

- Graduate/post-graduate in computer science, IT, or engineering.

- 3–5 years of relevant experience in technology development, digital solutions, software/application development, cloud/platform management, data analytics, automation or technology projects.
- Programming & Development: Python, SQL, JavaScript, HTML/CSS, Web Applications, APIs, Databases
- Cloud & Platforms: AWS / Azure / Google Cloud, hosting, deployment, developer environments and platform administration
- Data & Analytics: Data analysis, visualisation, dashboards, BI tools, data modelling and automation
- Excel & Modelling: Advanced Excel, financial/analytical models, scenario analysis, VBA/automation
- Experience in FinTech, BFSI, risk, compliance or RegTech will be an advantage.
- Ability to work independently and manage multiple technology initiatives.
- Comfortable working across technology, data, analytics and business requirements.
- Strong problem-solving, ownership and builder mindset.
- Strong communication and stakeholder-management skills, including working with senior management and external technology partners.

How to apply

4. Please send your latest CV with current and expected CTC to sro@faceofindia.org; teamface@faceofindia.org with Manager, Tech solutioning in the subject line.
